## **EBF Checklist - Short**

## Prior to Turning On the EBF ☐ Check the oil in the vacuum pump. ☐ Check dust collector bags. ☐ Move the control cabinet into the red taped area. ☐ Turn on air compressor. ☐ Check that compressed air is supplied to the table - at least 70 psi. □ Load cutters/endmills into the tool holders and tool holders into the correct slots. □ Adjust the dust hood if necessary. ☐ Move rubber gasket material to the correct positions for your piece. **Turning Machines On** ☐ Turn on the EBF at main circuit breaker. ☐ Turn on the local power disconnect via the big red lever to the left of the machine. ☐ Turn the rotary switch on back of the control cabinet is to 'Marche' ☐ Turn on the control cabinet power on left side of the control cabinet. ☐ Open the cabinet and push the power button on the computer. Setting Up To Cut □ Launch WinCNC □ Press "Home" on WinCNC ☐ Press the "Set X0 Y0 Z0" button ☐ Position your spoil board/fixture and work material. ☐ Load your tool table in WinCNC if needed (not frequently used). □ Touch-off each tool - Set Tool Z ☐ Cover any unused holes in the vacuum table. ☐ Turn on the vacuum by pressing the "Vacuum" button on WinCNC. ☐ Check the security of your spoilboard, fixture, and/or work piece. ☐ Touch off the tool on the top of your workpiece - Set Material Z. Make sure vacuum is on. ☐ Jog the spindle to where you want your material X and Y zero to be. ☐ Press the "Set Work X0 Y0" button.

## Loading the GCode and Cutting

☐ Save your GCode file from your flash drive to the computer.

	Turn on the dust collector.  Drop the machine pins if you raised the pins for aligning your work piece.  Open the GCode file in WinCNC.  Press Enter. This will pickup the correct tool and start the spindle.  Once you hear the spindle spinning, press Enter again to start cutting.
Post Cut	
	Turn dust collection off
	Press the "Go To Parking" button.
	Lower the spindle Z height to just over the pad in the parking position.
	Exit WinCNC
	Remove your material
	Vacuum top, under and around machine
	Empty dust collection bag(s) if full
	Remove endmills from tool holders and replace all Makersmiths parts inside the cabinet.
	Shut down Windows
	Turn off cabinet (black switch on left side of cabinet)
	Turn switch on the back of the cabinet to "Arrete".
	Turn off power at the local breaker box behind the cabinet - big red lever.
	Turn off EBF breaker in the breaker box in the metal shop.
	Move the PC cabinet back out of the way and so that the metal shop door can be opened.
	Put the large spoilboard back on top of the EBF to prevent shop dust etc. from getting into vacuum holes.
