

Move to purchase a SmartStitch S-1501 Ultra Embroidery Machine through our Amazon business account.

- The purchase of the machine, attachments, and initial consumables will be handled by accounting as a New Project.
- Purchase cost will be according to the below included table.
- Maintenance and Consumable budgets modifications are listed for the current Arts/Crafts/Sewing budgets.
- Members need to provide their own consumables. (This does not preclude our purchase of an initial thread supply for which, if used by members, we would suggest a donation (without a specific amount).
- The use of the machine is included in membership. There is no cost-share.
- Red Tool consumables will be purchased based on the needed class supplies.
- For other classes, consumables are also purchased based on the class needs (non-Red Tool class supplies are not budgeted).
- For their own projects, members would need to bring the item they want to embroider on, embroidery thread, bobbins and bobbin thread, backing, stabilizers (fusible, water-soluble, or other based on what the machine will accommodate), design transfer tools (if needed), and other supplies as necessary for their particular project.
- The Machine Stewards will be Any Copley and Erin Werling.

Embroidery Machine
