

Leesburg Committee Report - August 2026

- The Leesburg site hosted Makersmiths' Summer BBQ just a few weeks ago. A great opportunity for the influx of new Members to get to know us as well as some of the tried & true membership to see each other after some time, share projects, good vibes, and be excellent to each other.
- The Fume Room Shop is now fully operational and open for Member usage.
- The Smartstich embroidery machine has been successfully delivered and Stewards Amy Copley and Erin Werling are making great progress with configuration and building of class structures.
- The front patio entryway has seen a good bit of cleanup, especially regarding the overgrowth of the foliage around the stairs. A bench has been donated for our front patio with a plan put into process to clean & restore it.
- A new, taller toilet has been installed in the upstairs restroom thanks to a donation by Member Dave Hamrick.
- The Big Red CNC has had components refurbished by Steward Brad Hess and software configuration is ongoing.
