

IT Activity Report - April 2026

Summary

Over the past month, IT efforts included replacement of the UV Printer and BN-20 desktop computer, resolving a longstanding Arlo issue in Leesburg, and cleanup activities on Leesburg desktops.

Desktops

- Legacy UV printer desktop decommissioned 25 March.
- Installed Bambu Labs on Purcellville Greenroom computer in support of new 3D Printer.
- Ran debloat scripts on Leesburg desktop computers. Removed extraneous Windows 11 functions such as Copilot and Xbox game apps, intended to improve performance and UX.
- Big Red desktop machine next in line for replacement. Current legacy desktop hardware prevents any additional security updates past November 2025.

Physical Security

- Longstanding issue with Arlo cameras on Leesburg entrance resolved. Standing request to update position of cameras.
