BN2-20 Printer

Printer Overview

The Roland BN2-20 is an Eco Solvent printer that is great for making stickers, Heat Treat Vinyl Transfers, banners and other materials. It accommodates 20" wide material and can print up to ~18.5" wide on 20" material. It can do detailed cut outs of stickers, and other transfer materials using the built in blade, and the eco solvent ink lasts much longer in outdoor or wet settings than water based inks.

FROM ROLAND: With the next-generation BN2, Roland DG has taken a great thing and made it even better. These compact powerhouses offer significantly faster print speeds, convenient new features, ease of use, and a space-saving design that allows for placement in a home, office, or shop. The BN2 is everything you need to get started in professional print and cut graphics production.

- Professional quality printing and cutting functionality allows for a wide range of applications
- Faster print speeds for optimum productivity
- Affordably priced to suit the budgets of start-ups, & smaller businesses
- Easy to use – even for those with no prior printing experience
- Compact size is ideal for print environments with limited space
- Feature-filled, intuitive design and output software included

Information on the BN2 line of printers can be found here: <https://www.rolanddga.com/products/printers/versastudio-bn2>
