

CNC mill "Big Red"

Reservations

The Big Red is one of the tools/machines you have to reserve to use it. Put in your reservation at <https://makersmiths.org/Big-Red-CNC-Reservations>

Dust collector

- When do I empty the Big Red dust collector? When the bottom gets full to someplace around this blue line, you're going to want to empty it soon. HALF FULL IS FULL.

- The bag flew off. How do I tighten the straps? (INSERT VIDEO)
- How do I put the bag back on? (INSERT VIDEO)
- Taking the bags off is just the opposite of putting them on. Find that loose end and work it backwards through the buckle.
- PLEASE be careful not to bump into the gantry or the motor that sticks out on the side, as you move toward the dust collector.
